**Trading Credit**

The Trading Credit is a virtual amount of a variable value, available on the Trading account once it has been opened. When an electronic transaction is made, broker commissions relating to the transaction will be automatically deducted from the available Trading Credit (e.g. if the broker commissions are CHF 25, this sum will be deducted from the available amount).

The Trading Credit is not convertible into cash and is valid for a limited period only. It will be removed from the account on its expiry, even if it has not been entirely used.
